COLE MILWEE

3416 wall street, canton, 48188 | 7346123422 | rocolebot@gmail.com
https://github.com/colemilwee

OBJECTIVE

I want to better myself at coding while making it a hobby and profession. I'm willing to learn new code and work with new people

SKILLS & ABILITIES

I'm able to use HTML, CSS, Javacript, Jquery, Node.js, Api, Plugins SQL, MongoDB, React, and much more. I've Worked on projects with other people while working on my own before. Ive worked on a password generator using mostly java and html with css. The idea is to ask the user for how long the password and what characters they want here's an example
https://colemilwee.github.io/HomeworkPassword/
Another one that worked on was a work day scheduler I used HTML, CSS, and Jquery it displayed the time of day while allowing you to save data of something that you wanted to remember here's an example https://colemilwee.github.io/homeworkScheduler/
My first big project was a music generator that used HTML, CSS, Jquery, Javascript, and Api. What it did was the user typed in an artist and the api Key would plug in that artist and display something similar to said artist Here's an example
https://rubbokate.github.io/Music-Generator/
A big project i worked on was a travel log with others the goal was to be able to find new location when traveling using google maps api
JJG1488/Travel-Logger (github.com)
One assignment i really enjoyed was an in line project for easy readmes it used mostly javascript and node you were able to make simple and understandable readmes
colemilwee/easy-readme (github.com)
My last big project in class was AWTY it was designed with react mongo and servers. Its deployed to heroku and was made for students and teachers to help people follow along
devontehillman/are-we-there-yet (github.com)

EXPERIENCE

I've being studying code for the last six months and I'm continuing to learn More in class and out of class. While working with others.

EDUCATION

MSU Coding Bootcamp

COMMUNICATION

I've worked on a project with others before I have no issue explaining To others or working with them to meet our goals.
